

"El saber de mis hijos
hará mi grandeza"

International Workshop on Sustainability Oriented Innovation

OBJECTIVE:

To explore possible integration and strategies for research projects on sustainable oriented innovation.

The International Workshop on Sustainability Oriented Innovation is a joint effort by the Dutch Organization for Research and Applied Science (TNO Innovation for life) and the Sustainability Graduate Program of the University of Sonora.

The workshop will be held on

NOVIEMBRE 21 - 22 Industrial Engineering Department

UNIVERSIDAD DE SONORA

HERMOSILLO, SONORA, MÉXICO

Speakers:

- Dr. Carlos Montalvo, Senior scientist at the TNO Innovation for life in the Netherlands
- Dr. Richard Hawkins, Professor of the Science, Technology and Society Program at the University of Calgary, Canada

Guests:

- Researchers and academics from different universities.

The workshop is aimed at professors, researchers, academics and students interested and involved in research projects on innovation and sustainability. Priority will be given to professors and researchers.

Requirements the course is free of charge, however, it is required at least an intermediate level of English:
